DOW Product Table

Name	Description	URL	Contact
<p>DOWSIL™ Silicone Air Barrier System</p> 	<p>Uncontrolled air leakage can result in increased energy use and costs. DOWSIL™ Silicone Air Barrier System is specifically designed to ensure the airtightness of the building envelope.</p> <ul style="list-style-type: none"> • The air infiltration rates of DOWSIL™ Defend Air 200 beat current industry standards, helping keep energy costs down. • By securely adhering to challenging flashing materials and construction substrates, DOWSIL™ 758 Silicone Weather Barrier Sealant ensures continuous sealing without additional penetrations from mechanical fasteners. 	<p>https://www.dow.com/documents/en-us/app-tech-guide/63/63-61/63-6163-01-air-barrier-system-overview.pdf?iframe=true</p>	
<p>Cool Reflective Roof Coating TECHLINE 11</p> 	<p>Elastomeric Reflective Maintenance Coatings increase the longevity and energy savings of bitumen roofing.</p>	<p>http://msdsse.arch.dow.com/PublishedLiteratureDOWCOM/dh_09ae/0901b803809ae2fd.pdf?filepath=dcc/pdfs/noreg/840-02301.pdf&fromPage=GetDoc</p>	
<p>DOW CORNING® 3-0117 SILICONE INSULATING GLASS SEALANT</p> 	<p>Dow Corning® 3-0117 Silicone Insulating Glass Sealant is a single-component silicone elastomer intended for use as a secondary sealant in a dual-sealed insulating glass unit, and can be used in a unit that is structurally glazed. Dow Corning® 3-0117 cures in the presence of atmospheric moisture to produce a durable, high-modulus, flexible silicone seal that is chemically stable and shows little change in physical properties with weathering.</p>	<p>https://www.dow.com/en-us/pdp.dowsil-3-0117-silicone-insulating-glass-sealant.02328551z.html</p>

<p>LIQUIDARMOR™</p> 	<p>LIQUIDARMOR™ Flashing and Sealant is an innovative liquid flashing alternative to conventional tape. It is designed to provide commercial buildings advanced moisture and air sealing protection. The elastomeric spray forms a tight, durable, seamless barrier along the rough openings of windows and doors while helping to significantly reduce labor time during installation. A winner of the 2016 Edison “Gold” Award for Energy and Sustainability, LiquidArmor™ Flashing and Sealant delivers high-performance protection from moisture and air for commercial buildings.</p>	<p>https://www.dupont.com/products/liquidarmor-flashing-and-sealant.html</p>

<p data-bbox="138 434 316 499">Central Plant Optimization</p> 	<p data-bbox="354 434 1097 764">The next generation of Central Plant Optimization (CPO) software developed by Johnson Controls uses predictive algorithms to minimize cost, not just energy. This proven, patented technology uses up-to-the-minute data and looks out over a time horizon to help operators optimize cooling, heating and power generation in a holistic way. The approach helps make both plant design and operating decisions to minimize lifecycle costs and greenhouse gas emissions while delivering reliable utility services.</p> <p data-bbox="354 770 1097 1035">The CPO solution monitors all kinds of inputs, including data gathered from your connected equipment and systems to external information like weather forecasts, utility rates, and maintenance schedules. Using these inputs, updated every 15 minutes, our algorithms automatically generate optimization decisions and implement them so you can minimize utility costs and maximize available utility incentives.</p> <p data-bbox="354 1041 1097 1371">Much of a plant's future operating costs are locked in when making initial plant design decisions. The cloud-based CPO Planning Tool creates a virtual representation of your central plant and simulates plant utility costs for each hour of the year. It allows you to perform "what-if" scenarios, evaluate plant designs and upgrades, and compare actual performance with the original predictions. Plus, it interfaces seamlessly with the CPO Operational Tool to ease the process of installing and maintaining the CPO system over time.</p>	<p data-bbox="1125 434 1279 735">https://www.johnsoncontrols.com/digital-solutions/central-plant-optimization</p>	<p data-bbox="1307 434 1481 600">Michelle Bai +86 21 2285 7621 Michelle.Bai@jci.com</p>
<p data-bbox="138 1409 316 1474">Enterprise Management</p> 	<p data-bbox="354 1409 1097 1707">Building owners and managers can optimize building performance by monitoring equipment, managing energy consumption, and efficiently utilizing available space. The platform offers applications that provide you with actions and insights that identify issues and faults, pinpoint inefficiencies, and give tenants control of comfort and convenience features. Not only will it help you reach energy and sustainability goals, it will help you exceed one of your most important goals – occupant satisfaction.</p> <p data-bbox="354 1713 792 1745">Power to Manage and Visualize</p> <p data-bbox="354 1751 1097 1808">Monitor and manage data, equipment, and systems from a single pane of glass.</p> <p data-bbox="354 1814 748 1845">Power to Optimize and Save</p>	<p data-bbox="1125 1409 1279 1738">https://www.johnsoncontrols.com/digital-solutions/johnson-controls-enterprisemanagement</p>	<p data-bbox="1307 1409 1481 1575">Michelle Bai +86 21 2285 7621 Michelle.Bai@jci.com</p>

	<p>Uncover ways to optimize energy efficiency and equipment uptime. Easily use KPIs to measure what is important to your organization.</p> <p>Power to Analyze and Act</p> <p>Data and insights significantly enhance your ability to harness the power of AI and machine learning to forecast.</p>		
<p>Metasys™ Building Automation System</p> 	<p>Metasys makes your building smarter and more efficient. It connects your HVAC, lighting, security and fire protection systems, and gets them all “talking” to each other in a common language, on a single platform to give you information you need to make better decisions, save money and improve the way your building functions.</p> <p>INFORMATION</p> <p>As it controls equipment, Metasys also collects critical data, which it turns into powerful information you can use to make decisions about your energy and operations strategies.</p> <p>VISUALIZATION</p> <p>The user interface presents information in a simple, intuitive way to help you quickly identify potential problems. So trouble-shooting is simpler, and order is restored in less time.</p> <p>OPTIMIZATION</p> <p>Even more information is available through powerful energy analytics to analyze Metasys data stored on premise or in the cloud. This information is also accessible anywhere, on virtually any device.</p>	<p>https://www.johnsoncontrols.com/building-automation-and-controls/building-management/building-automation-systems-bas</p>	<p>Michelle Bai +86 21 2285 7621 Michelle.Bai@jci.com</p>

LUTRON
Product Table

Name	Description	URL	Contact
Radio Powr Savr™ wireless occupancy sensor	  <p>Lutron Radio Powr Savr™ wireless occupancy/vacancy sensors are engineered to maximize energy savings and</p>	<p>http://www.lutron.com/en-US/Products/Pages/Sensors/Occupancy-Vacancy/WirelessRadioPowrS</p>	<p>Greg Chann ggchen@lutron.com +86-185-2178-5913</p>

	<p>ease installation. It saves energy by directing compatible wireless controls to turn lights/ plug loads off based on room occupancy. Going wireless eliminates the need for costly new wiring and each sensor can be installed in as little as 15 minutes.</p> <ul style="list-style-type: none"> • Saves installation cost and time • Utilizes Lutron reliable Clear Connect™ RF Technology to ensure consistent performance • Lutron XCT signal processing technology enhances the performance for detecting fine motions • Vacancy modes for maximum energy saving with manual on and auto off operation • Front accessible buttons make set up easy • 10-year battery life • Available in ceiling-mount, wall mount, corner-mount and hallway options 	avr/Overview.aspx	
<p>Radio Powr Savr™ wireless daylight sensor</p>	<div style="text-align: center;">   </div> <p>This battery-powered, ceiling-mount wireless daylight sensor saves energy by dimming or turning off electric lighting when sufficient daylight is available. The sensor detects light in the space and then wirelessly transmits the appropriate commands to the compatible dimming and switching modules via Lutron Clear™ Connect Radio Frequency (RF) technology.</p> <ul style="list-style-type: none"> • Features Lutron reliable proportional daylight open loop control • Designed to give a linear response to changes in viewed light level • Has a light range of 0-100,000 lux and a photopic response that matches human eyes • One sensor is capable of switching and continuous dimming of multiple zones per changes in daylight level • Simple calibration with front accessible test buttons for easy setup • 10-year battery life 	http://www.lutron.com/en-US/Products/Pages/Sensors/RadioPowrSavrDaylightSensor/Overview.aspx	<p>Greg Chang ggchen@lutron.com +86-185-2178-5913</p>

<p>Pico® wireless switches/keypads</p>	 <p>Pico® wireless switches/keypads can adjust lights, shades from anywhere in a space. This versatile and easy-to-use controller requires no wires and is compatible with a wide variety of Lutron lighting control and automated window treatment solutions.</p> <ul style="list-style-type: none"> • Utilizes Lutron reliable Clear Connect™ RF technology with a range of 9m through wall • Available as a wall-mount, table - top or handheld control • Offers single or dual gang faceplates in different finishes including glass, metal and plastic • Easy to relocate and add a new or additional point of control without running conduit or cable • 10-year battery life 	<p>http://www.lutron.com/en-US/Products/Pages/Component/PicoWirelessController/Overview.aspx</p>	<p>Greg Chang ggchen@lutron.com +86-185-2178-5913</p>
<p>Vive™ wireless lighting control</p>	 <p>Vive™ is a revolutionary, modular wireless lighting control solution for new and existing commercial buildings. The Vive wireless hub provides centralized control and integration for all wireless devices such as keypads/switches, occupancy and daylight sensors with lighting control modules. Use Vive software on any smart phone to wirelessly connect system controls and program system settings, including energy reporting, schedules and load shed.</p> <ul style="list-style-type: none"> • A simple and scalable solution for every space and budget • Meet latest green building standards • Easy to set up without engineers from manufacturers 	<p>http://www.lutron.com/en-US/Products/WholeBuildingSystems/Vive/Overview.aspx</p>	<p>Greg Chang ggchen@lutron.com +86-185-2178-5913</p>

	<ul style="list-style-type: none"> • RF signal strength detection technology automatically finds nearby devices making job setup faster • Seamless integration with building management systems through BACnet 		
<p>Quantum® total light and energy management system</p>	 <p>Quantum® is a Lutron system management by tying the most complete line of lighting controls, automated window shades, digital LED drivers, and sensors together under one software. It provides facility managers and owners the ability to collect and manage data that optimize the environment for occupants and improve building operations and energy efficiency.</p> <ul style="list-style-type: none"> • Ideal for new construction or retrofit applications and scalable from a single area to an entire building, or to a campus with multiple buildings • Manage, monitor and report on all the lighting energy usage in a building • Multi-control strategies to manage all the light in your building with intuitive graphical user interface (GUI) • Seamless integration with building management systems through BACnet • Advanced capabilities, such as tunable white control and solar-responsive shading software, ensure a responsive system able to provide the right environment throughout the day 	<p>http://www.lutron.com/en-US/Products/Pages/WholeBuildingSystems/Quantum/Overview.aspx</p>	<p>Greg Chang ggchen@lutron.com +86-185-2178-5913</p>
<p>Hyperion™ solar-adaptive shading system</p>	 <p>Wireless window sensor</p>	<p>http://www.lutron.com/asia/Products/Pages/ShadingSystems/Hyperion/Overview.aspx</p>	<p>Greg Chang ggchen@lutron.com +86-185-2178-5913</p>

	<p>Hyperion™ solar-adaptive shading system automatically adjusts Lutron Sivoia QS shades throughout the day in response to the changing position of the sun, saving energy, and reducing glare and heat gain. To allow direct sunlight to penetrate deeper into the workspace, customized shade schedules are developed by combining information about building location and façade orientation.</p> <ul style="list-style-type: none"> • Automatic shade adjustment using advanced solar tracking technology, with or without sensors • Maximize occupant comfort, natural daylight, available views, and energy savings • Adding Window sensors to adjust shades based on both the sun's position and changing exterior weather conditions on that façade to maximize performance and minimize unexpected shade movements • Flexible manual control of shades possible at any time to override Hyperion control to suit personal preference

III. Direct Current (DC) Buildings and Smart Grid

LumenCache Product Table

Name	Description	URL	Contact
LumenCache DC lighting system	<p>The LumenCache platform replaces traditional 110V AC power distribution in buildings with a new standard more appropriate to the low power needs and digital capabilities of electronic devices including LED lights. LumenCache connects the grid edge (devices inside your power meter) to the installed devices that consume the energy using proven structured wiring techniques.</p> <p>>10% Power Delivery Improvement over AC.</p> <p>Give residents FREE LIGHTING. Why? Because it's typically less than \$7/mo & installation costs less.</p> <p>Battery means lighting and mobile device charging are ALWAYS AVAILABLE, regardless of grid power availability.</p> <p>Add sensors to LumenCache or whatever new tech is invented in the future to add the latest in efficiency and convenience.</p> <p>Gateway API for lots of smart apps: Control, Energy Management, Access Control, Security, Asset Tracking, Home Healthcare, ...</p>	http://lumencache.lighting/why-lumencache/

NEXTEK Product Table

Name	Description	URL	Contact
<p>PHD: Power Hub Driver</p>	<p>The Power hub Driver is the next generation of Nextek's flagship product. It provides 16 fully controllable channels that provide up to 1600 watts of low voltage power output.</p> <p>Due to ever changing Building and Energy Codes, power and lighting systems are undergoing an industry wide transformation that requires components to be interactive, responsive, efficient, reliable and in a word, SMART! The Power hub Driver provides the ideal platform to support this evolution of smart power technologies. From the fully integrated multiple</p>	https://www.nextekpower.com/new-page-18	

	<p>communication options, to the significant array of built-in safety and performance features, the PhD can support a wide assortment of highly efficient DC powered fixtures and loads within buildings of today and tomorrow. The PhD also offers the unparalleled opportunity to provide full integration with a variety of renewable power sources. In short, the PhD is 'Really Smart Power'.</p>		
<p>SKY Controls</p> 	<p>Nextek Power Systems offers complete control of your building lighting through the SKY-Controls system of sensors, devices and cloud-based software. The SKY system consists of a family of control devices that communicate with each other in a wireless mesh network to provide a new standard of control and energy monitoring. This translates into the most cost-effective energy saving technology available. The highly programmable and interactive control architecture allows you to make the most efficient and responsive changes to your environment. The SKY-Controls system helps you realize significant savings for your facilities.</p>	<p>https://www.nextekpower.com/sky-controls</p>	
<p>FANWORK S</p> 	<p>Nextek Fanworks DC Ceiling Fan products and accessories are the perfect solution for improving the airflow in indoor areas where AC power is not available. Our DC ceiling fans are a perfect fit for your home, office, cabin, gazebo, greenhouse, school, warehouse, or any location where AC power is not readily available. Solar panels and speed controls are also available for maximum energy efficiency.</p>	<p>https://www.nextekpower.com/fanworks-catalog</p>	
<p>Power Server Modules</p> 	<p>The Power Server Module is Nextek's flagship product. It features 16 fully controllable channels that provide up to 1600 Watts of low voltage power output. Nextek's Power Server Module converts 120, 208, 240, 277 VAC, or 380 VDC power to 24 VDC through 16 individual Class 2 outputs. The Power Server Module has a wireless remote control and monitoring system. The system advantage of the Power Server Module is a safe, low-voltage DC distribution system that supports quick plug-and-play, energy efficient and individually controllable Direct Current (DC) lighting and other loads. Nextek's Power Server Module accepts power inputs from both DC and AC sources, to ensure your systems are never without power. When the DC resource is no longer available, the PSM automatically converts AC power to DC.</p>	<p>https://www.nextekpower.com/new-page</p>

Wattstopper Product Table

WattStopper®

Name	Description	URL	Contact
Wireless Network Bridge 	The LMBC-600 Wireless Network Bridge provides a network connection for a room with Wattstopper Digital Lighting Management (DLM) devices. The wireless DLM platform simplifies room to room connectivity and installation, and eliminates potential start-up delays caused by wiring issues.	https://www.legrand.us/wattstopper/digital-lighting-management/network-components/lmbc-600.aspx	
ON/OFF/0-10V Dimming Room Controllers 	LMRC-110 series room controllers include one or two relay(s) to switch a total of 10 amps, a high-efficiency switching power supply and dual 0-10 volt outputs per relay for control of dimmable loads including compatible LED drivers or electronic ballasts. They are the foundation of a Digital Lighting Management (DLM) system, and allow integration of occupancy sensors, daylighting controls and switches for energy-efficient control.	https://www.legrand.us/wattstopper/digital-lighting-management/load-controllers/lmrc-11x.aspx	
Architectural dimming platform 	The architectural dimming panel platform products include the Lighting Control and Automation Panel (LCAP) series, and a range of unique user interfaces. The platform seamlessly integrates with the award-winning Digital Lighting Management (DLM) system to deliver optimal energy performance and integration with A/V, shades, climate, and other systems.	https://www.legrand.us/lighting-controls/building-systems/architectural-dimming.aspx	
Fixture Sensors & Controls 	We've engineered our fixture integrated (FS) and our high bay (HB) sensors for optimal performance. So even in the most challenging applications, such as wet and outdoor environments, effective lighting control provides energy savings you can count on.	https://www.legrand.us/lighting-controls/building-systems/fixture-sensors-controls.aspx	
Network Segment Manager (Segman)/ Network supervisor 	The LSM Segment Manager is a network controller designed to communicate with DLM local networks and/or LMCP panels. It provides control, monitoring, adjustment, and standard or Human Centric Lighting (HCL) scheduling functionality for networked DLM systems. The Network Supervisor is a PC server running similar software designed to coordinate control of multiple Segment Managers and store historical data.	https://www.legrand.us/wattstopper/digital-lighting-management/network-components/lmsm-segment-manager.aspx

IV. HVAC Energy Savings for Indoor Air Quality

eLichens Product Table

Name	Description	URL	Contact
Indoor Air Quality Station 	<p>eLichens' sensors are integrated into an Indoor Air Quality Station which is compact, low power and cost optimized to offer relevant measurement of indoor air pollutants such as CO₂, VOC, PM_{2.5}, PM₁₀ and also temperature, pressure, humidity and noise. The station is connected to a cloud for the data to be cloud calibrated and treated. Thanks to eLichens' platform, it is also possible to have access to outdoor air quality data and obtain a complete study of the air you breathe outside and inside.</p> <p>Depending on the application, the station can be customized to fit the need of our customers.</p>	https://www.elichens.com/smart-home	Marc Attia, +1 415-573-7595, marc.attia@elichens.com
ULTRA-LOW-POWER CO ₂ SENSOR 	<p>Possessing cutting-edge NDIR (Nondispersive Infrared) patented technology including patented IR source, patented optical design and advanced signal processing algorithms, eLichens CO₂ sensor is the smallest, ultra-low-power consumption CO₂ module in the world. The low-power is a key differentiator permitting innovative applications based on energy harvesting or battery-powered products.</p> <p>Its mechanical architecture can be customized to meet better integration into final products.</p> <p>Key features include:</p> <ul style="list-style-type: none"> • Measurement range: 0-10,000 ppm • Small and compact design for an easier integration • Ultra-low-power consumption • Very low peak current • Simple digital communication UART interface • High accuracy with NO drift over time • Factory calibrated with temperature compensation • Fast response time 	https://www.elichens.com/hvac-dcv	Marc Attia, +1 415-573-7595, marc.attia@elichens.com
